

“I have been known to say that there is a bit of an optimist in all oncologists. We have to maintain a positive attitude for our patients and for ourselves. Georgia CORE gives us an outlet for this optimism—a way to build infrastructure and collaboration to advance discovery, and an opportunity to expand access to cutting edge treatments. Ultimately, we are all seeking the same success in new cures for cancer.”

Established by the Board of Directors of Georgia CORE, this program was created to honor Dr. Thomas E. Seay, a leading and greatly admired medical oncologist who was President of Atlanta Cancer Care, a member of the medical staff of Northside Hospital, and a founding member and chairman of the Georgia CORE Board. The annual lecture is designed to promote improvements in treatment, research, quality and collaboration in Georgia – each representing an area of great importance to Dr. Seay.

Thomas E. Seay, MD, PhD

Lectureship Program

**Welcome and Recognition of
Honored Guests and Sponsors**

Nancy M. Paris, MS
Georgia CORE

Legacy of Dr. Thomas E. Seay

Patti Owen, MN, RN
Northside Hospital

**Introduction of Lectureship
and Douglas B. Evans, MD**

H. A. Zaren, MD, FACS
*Nancy N. & J.C. Lewis Cancer &
Research Pavilion at St.
Joseph's/Candler*

Personalized Medicine for Localized Pancreatic Cancer

Douglas B. Evans, MD

Medical College of Wisconsin

Closing Remarks

H. A. Zaren, MD, FACS
